

TCSO- Razor Ribbon Fencing

Addendum #1

1. Do you require American Made products?
No, it is not a requirement.
2. Can photos be taken during the onsite meeting?
Yes, however, no inmates can be seen in the photos.
3. Are there clearance/background check forms that need to be submitted before the visit?
No, we will not be inside any secure areas for the meeting.
4. Do you want the 5' extensions added on the building and fence?
No, fence only
5. Do you want 2 rows of barbed wire added?
Yes
6. Any standards on the razor ribbon wiring?
Yes, the same as we have (30 in Super Maze)
7. Will the arms (extension) added need to be welded?
Not mandatory. You can use welding, cups, etc. as long as it will support the wire firmly in place.
8. Will the wiring be the same around pods A and C as it is around pod B?
Yes
9. Will the walk-through gate remain on the Pod C side?
Yes
10. Do we account for any extra fencing that needs to be replaced or stick strictly to the list in the Scope of Work?
We have included in our budget up to a 10% increase for fencing should current wiring be found that needs to be replaced. Notify the TCSO supervisor on duty of damage found and obtain authorization to replace it. Documentation should be maintained for submission when project is complete.
11. What will be the days and hours we will be able to work onsite?
7 Days a week from 7am until 5pm
12. Can we bring in equipment, such as a lift, etc. to install the material?
Yes, but you will need to bring your own.

13. Your guidelines show bids must be honored for 60 days. Our suppliers are give quotes with as little as 5 days before they expire due to the changing pricing. It will be difficult to honor a bid for 60 days.

This project has been pre-approved by the Board of Commissioners. After a bid is chosen, the quicker you submit your vendor packet, certificates of insurance and a contract is signed, the better. We will have a quick turnaround and be able to move forward quicker than normal due to the BOC prior approval. After the contract is signed by both parties, we can issue the PO for authorization of payment upon completion of the project. This will allow you to obtain the necessary bonds and begin work after we have them in our files.
